EDUCATION

M S Ramaiah Institute of Technology, Bengaluru 2022 - 2026
Bachelor of Engineering — **Artificial Intelligence and Machine Learning - CGPA: 9.60**

EXPERIENCE

AI/ML Engineer Intern - Shubhashaya by GiftSYZ Aug 2026 – Present
AI-Powered Product Information Management System | Python, Anthropic Batch API, Supabase PostgreSQL
• Automated product-data and image extraction from vendor catalogues by building a multimodal AI pipeline using Claude Sonnet 5, reducing manual extraction effort by 80%.
• Optimized LLM processing costs by 50% by implementing asynchronous batch processing with crash recovery and error handling achieving 100% page-processing success across a 200-page benchmark spanning 4 vendor catalogues.
• Currently developing a product management platform with two-level product review and approval workflow, digital storefront, semantic recommendations, and custom deck generation and automated email-based quote requests.

Software Engineer Intern - Oracle India Private Limited (IDC) Jan 2026 - July 2026
Aconex Viewer Team
• Reproduced and diagnosed customer-reported issues across multiple frontend, backend and underlying-platform versions to isolate root causes.
• Analyzed database object dependencies across 30 tables using SQL to determine a safe table-deletion order, preventing orphaned data and preserving data integrity.

ML Engineer Intern - 4SYZ Infotech Solutions Pvt Ltd Mar 2025 – Jun 2025
Automated Inventory Tracking and Product Categorization | Python, SQL, Machine Learning,Gradient Boosting
• Automated inventory-tracking by implementing a dynamic-threshold based system, reducing manual monitoring time by 10 hours per week.
• Streamlined inventory management by building an ML classification system to auto-categorize incoming stock, reducing manual data entry time while maintaining 88% accuracy.

PROJECTS

Influencer Recommendation System using Multimodal Representation Learning & Graph Neural Networks
PyTorch, Pytorch Geometric, CLIP ViT-B/32, GraphSAGE, FAISS, Autoencoders, YouTube Data API, Apify [project demo]
• Built an cross-platform influencer recommendation system covering 2,960+ YouTube and Instagram creators, combining multimodal embeddings, graph-based ranking and engagement anomaly detection.
• Developed a GraphSAGE-based ranking model using creator relationships and CLIP embeddings for semantic brand queries, used autoencoders to flag potentially inflated engagement metrics.
• Evaluated against four baselines using LLM-annotated ground truth for creators from three domains, achieving 11.4x over TF-IDF.

AI-Multimodal Campaign Architect
Python, Pydantic, MCP, FastMCP, Gemini API, Unsplash API, pollinations.ai SDK, gTTS [project demo]
• Built an MCP-based agentic workflow that generates campaign copy, moodboards, voiceovers, presentation pitches and images from a single prompt.
• Implemented parallel execution of four independent tasks using Python asyncio, combining moodboard generation, voiceover synthesis, pitch creation and guardrail checks.
• Designed a human-in-the-loop checkpoint to validate visual direction before image generation, with bounded content refinement and a $0.50 per-session API cost cap to prevent uncontrolled spending.

TECHNICAL SKILLS

Programming and Data : Python, SQL, Pandas, Numpy, Matplotlib, Seaborn, Exploratory Data Analysis, Feature Engineering
Machine Learning : Classification, Regression, Clustering, Anomaly Detection, Model Evaluation, Hyper-parameter Tuning, Scikit-learn
Deep Learning : PyTorch, Transfer Learning, HuggingFace Transformers, CNNs, Graph Neural Networks
Applied AI : Large Language Models (LLMs), Prompt Engineering, Model Context Protocol (MCP), Agentic AI, FAISS, Embeddings
Mathematics for Data Science : Statistics, Probability, Hypothesis Testing, Linear Algebra

CERTIFICATIONS

• Introduction to Model Context Protocol (MCP) — Anthropic [View Certificate]
• Machine Learning Specialization — Stanford Online, DeepLearning.AI [View Certificate]
• Mathematics for Machine Learning and Data Science — DeepLearning.AI [View Certificate]
